**Re: *Notice of Ex Parte Presentation*
 IBFS File No. SAT-LOA-20190704-00057; Call Sign S3051**

Dear Ms. Dortch:

On March 19, 2020, Julie Zoller, Kalpak Gude, Darren Achord, and Mariah Dodson Shuman of Amazon spoke by telephone with Aaron Goldberger of the Office of Federal Communications Commission Chairman Ajit Pai and Troy Tanner of the Commission's International Bureau.

We reiterated the public interest benefits of rapidly granting Amazon's application to launch and operate a constellation of 3,236 low-earth orbit satellites. Amazon's application was accepted by the Commission and has satisfied all requirements for grant, as demonstrated by the public record.

Further, to ensure that all non-geostationary satellite systems are able to compete effectively and co-exist without harmful interference, we encouraged the Commission to require all non-geostationary satellite licensees engaged in coordination to share detailed information about their operations. Implementation of fair and reasonable mechanisms will enable efficient use of spectrum and allow all NGSO systems to expand urgently needed broadband services to as many customers as possible.

Please contact me with questions about this submission.

Respectfully submitted,

/s/ Mariah Dodson Shuman
